Renaissance Package for K-12 Technology

The Renaissance Institute provides a package of services to provide support and insight into the technology program in your organization. The K-12 package contains a combination of consulting services and products that school districts find critical for efficiency and accountability.

1. **Planning, Oversight, Support, and Executive Coaching:** Advisors meet with your staff--either in-person or remotely--at regular intervals to discuss current issues and strategic planning for upcoming projects.
2. **Digital Review of Upcoming Initiatives and Purchases:** Advisors will review upcoming projects and purchases to provide a risk: benefit analysis and make recommendations. This review can also be performed retroactively to provide options on projects that have not gone as well as advertised.
3. **Ex Dates Monitoring:** Advisors monitor expiration dates of existing technology licensing and agreements—perform a digital review--and negotiate best renewal or cancellation.
4. **Project Management:** Advisors manage technology initiatives with your best interest in mind. The Institute is vendor and platform neutral.
5. **Network Monitoring:** Proactive monitoring of up to 50 critical devices in your data networks and server infrastructure.
6. **Discounted Access to Insight Tools:** Insight tools provide real-time and predictive insight into your technology program.
 - a. **Virtual Information Center (VIC)** a tool to monitor actual technology use in your district. This tool provides feedback on the use and value of your technology purchases and initiatives.
 - b. **Electronic License Manager(ELM)** a tool to monitor licensing of materials. This tool allows you to conserve on licensing costs as well as provide feedback into the use of instructional materials.
7. **Research:** Inclusion in the K-12 Educational Data Mining Research Consortium and full access to all Institute research on the impact of technology in teaching and learning.
8. **Training:** Leadership and teacher training on the role of technology in teaching and learning
 - a. Online training for technology certificates
 - b. Certified online training for school board member
9. **Think-Tank meetings:** Once per year, Institute members and advisors meet to discuss the state of emerging technology and current technology issues.
